Scores Casino Bonus Wagering Requirements
The wagering requirements needed to clear a casino bonus vary by game. Below are examples on how bonuses can be cleared with detailed play through contributions per game at Scores Casino:

Clearing a bonus on a 100% contribution game
A player has a $100 Casino Bonus with a 10X wagering requirement. The Player wagers $1,000 on Berryburst (100% play through contribution).

All $1,000 or (100%) of their wagering on Berryburst contributes towards the wagering requirements to clear the casino bonus. The wager requirements would be satisfied in this example.

Clearing a bonus on games with variable contribution games
A player has a $100 Casino Bonus with a 10X wagering requirement. The Player wagers $500 on Berryburst (100% play through contribution), $250 on a Starmania (20% play through contribution) and $250 on Blackjack.

The $500 wagered on Berryburst contributes 100% towards the wagering requirements to clear the casino bonus.

The $250 wagered on Starmania contributes 20% towards the wagering requirements to clear the casino bonus.

The $250 wagered on Blackjack will not count towards the bonus clearing wagering requirements.

In total the player in this example would have cleared $550 of the 10X wagering requirements:
$500 from game play on Berryburst.
$50 from game play on Starmania.
$0 from the Blackjack.
The player would still have $450 in wagering at 100% contribution to clear the bonus.

All CanPlay Casino games will contribute 100%, except the following:
